

Integrated Solution GPS & Telematic Devices

Ward - Go Fuel - Interface[®]

Fuel authorization interface for Ward Fuel Management customers

The Ward - Go Fuel - Interface (WGFI) is an integrated solution for odometer validation and OBDII data sharing between Samsara Gateway devices and Ward's Fuel Management system.

The WGFI communicates with a Fuel Control Terminal (FCT) to automate fueling access. The FCT collects and transmits the fuel transaction data, VIN, odometer, and engine hours to Fuel View SaaS, and all GPS and telematics collected are sent to the third-party software.

KEY BENEFITS

- 100% compatible interface with integrated devices and Ward Fuel Management Solution
- Authorize access to any controlled fuel dispenser and EV charger
- No batteries
- Easy installation

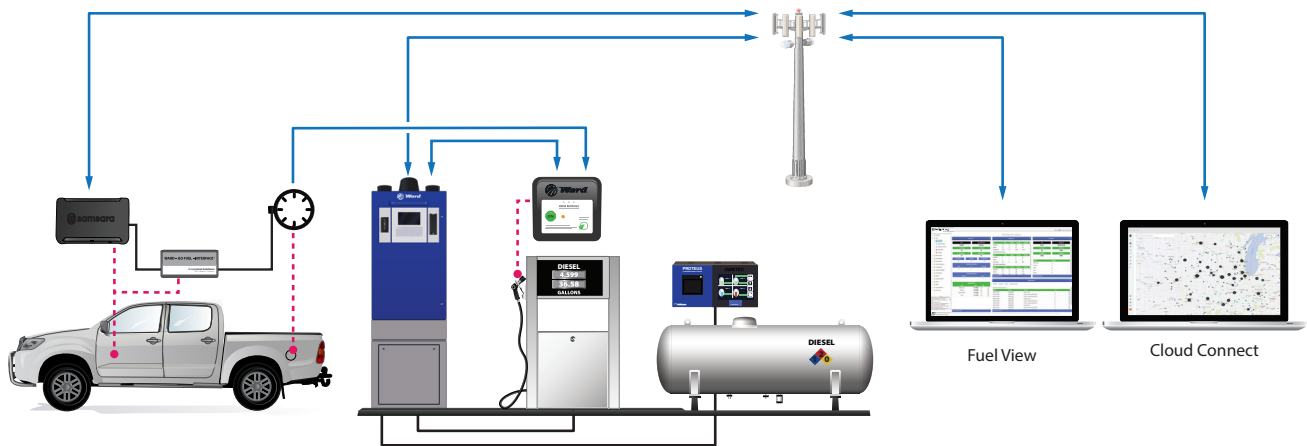

Compatibility

GPS Device	
Samsara Gateway	Yes
Geotab GO	Yes
Others	Under Development

Specifications

Voltage	<i>Samsara Gateway:</i> 5VDC from USB connection; Input 0-24V <i>Geotab GO:</i> 6-33VDC
Electrostatic Resistance	Non-conductive enclosure
Operational Temperature	-40°C to 85°C
Humidity	+85% RH per SAE specification
Dimensions	2.5" x 1" x .5" (W x D x H)

Solution Overview

Sample Ward Fuel Management System using a Samsara Gateway.
Sites and configurations will vary.
